Sir:

Responsive to the official action of February 1, 2000, please amend as follows:

In The Claims

Please amend claim 1 as follows:

sub F1  
1 A plasmid containing a cDNA sequence which encodes a protein designated p53as, said p53as being functionally equivalent in growth regulation to active wildtype p53, said p53 and p53as being sequentially the same up to the final 50 carboxy terminal amino acids of p53, said p53as being different than p53 within the final 50 carboxy terminal amino acids of p53 so as to lack a negative regulatory domain of p53 for p53 specific DNA binding found within the last 50 amino acids at the p53 carboxy terminus
